Continuation of 3. NOTE: Applicant's proposed after-final amendment filed January 7, 2010 will not be entered into the record because the proposed amendments to the claims raise new issues that would require further consideration and/or search.

In particular, it is noted that Applicant has proposed amending claim 40 to limit the pharmaceutical composition to be administered to carbenoxolone in combination with a pharmaceutically acceptable excipient and eliminating the recitation of pharmaceutically acceptable carriers or diluents. Thus, the proposed amendment narrows the scope of the claimed subject matter and clearly requires further consideration of the presently applied art, as well as an additional assessment of the prior art to determine whether such an amendment would obviate the art of record and/or whether additional art would need to be applied. As a result, the proposed amendments will not be entered into the record.

Accordingly, the proposed claim amendments are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal because they raise new issues that require further consideration and/or search.

Continuation of 11. does NOT place the application in condition for allowance because:

Applicant's request for reconsideration of the present application with regard to the rejections and/or objections of record in light of the amendments to the claims proposed and presented in the after-final amendment has been made. In light of the fact that the proposed amendments to the claimed will not be entered into the record, Applicant's remarks directed to the obviation of these rejections and/or objections as a result of the proposed amendments are not found persuasive.

For these reasons supra, the proposed amendments will not be entered into the record and the claims remain rejected for the reasons set forth in the final rejection dated July 7, 2009, of which said reasons are herein incorporated by reference.
